

Dangerous foods for dogs

(courtesy of WebMd "Slideshow: Foods Your Dog Should Never Eat" February, 2016")

Note: this list appears to include foods dogs "shouldn't" eat vs. just foods that are truly toxic. I know pizza crust, for example, probably isn't good for dogs, but I also know a little won't poison them. If you're unsure, do more research, call your vet, or call ASPCA Animal Poison Control Center, 888-426-4435.

- Xylitol (an artificial sweetener)
